ADUIS

ASSOCIATION OF DEVELOPERS AND USERS OF INTELLIGENT SYSTEMS

offers

to businessmen, engineers, sociologists, managers - all who use data bases -
collaboration in forming analytical information.

- ◆ Association has long-term experience in collaboration with teams, working in different fields of *research and development*. Methods and programs created in Association were used for revealing regularities, which characterize chemical compounds and materials with desired properties. Some thousands of high precise prognoses have been done in collaboration with chemists and material scientists of Russia and USA.
- ◆ Association can help *businessmen* to find out conditions for successful investment taking into account region or field peculiarities as well as to reveal user's requirements on technical characteristics of products being sold or manufactured.
- ◆ *Physicians* can be equipped with systems, which help in diagnosing or choosing treatment methods, in forming multi-parametric models that characterize health state of population in different regions or social groups.
- ◆ *Sociologists, politicians, managers* can obtain the Association's help in creating generalized multi-parametric "portraits" of social groups, regions, enterprise groups. Such "portraits" can be used for prognostication of voting results, progress trends, and different consequences of decision making as well.
- ◆ Association provides a useful guide in *technical diagnostics, ecology, geology, and genetics*.

ADUIS has at hand a broad range of high-efficiency original methods and program tools for solving analytical problems, such as knowledge discovery, classification, diagnostics, prognostication.

ADUIS unites the creative potential of highly skilled scientists and engineers.
