Part 1: Theoretical Aspects of Mathematics of Distances

Differential geometry derived from divergence functions: information geometry approach	
<i>Shun-ichi Amari</i>	9
Classification results for $(v, k, 1)$ cyclic difference families with small parameters	
<i>Tsonka Baicheva, Svetlana Topalova</i>	24
Logarithmic distances in graphs	
<i>Pavel Chebotarev</i>	31
Cones of weighted quasimetrics, weighted quasihypermetrics and of oriented cuts	
<i>Michel Deza, Vyacheslav P. Grishukhin, Elena Deza</i>	33
Cube-like polytopes and complexes	
<i>Andrew Duke, Egon Schulte</i>	54
A brief survey of metrics in coding theory	
<i>Ernst Gabidulin</i>	66
Regular inversive polytopes	
<i>Norman W. Johnson</i>	85
Construction of geometric divergence on q-exponential family	
<i>Hiroshi Matsuzoe</i>	96

Table of contents

Part 2: Applications of Mathematics of Distances

Metric based recommender systems

Ali Akhtarzada, Cristian S. Calude, John Hosking 103

Rank codes over Gaussian integers and space time block codes

Hafiz M. Asif, Ernst M. Gabidulin, Bahram Honary 118

Ultrametric Fechnerian scaling of discrete object sets

Hans Colonius, Ehtibar N. Dzhafarov 129

Symmetrization: ranking and clustering in protein interfaces

Giovanni Feverati, Claire Lesieur, Laurent Vuillon 133

Intervals as ultrametric approximations according to the supremum norm

Bernard Fichet 147

Distances on antimatroids

Yulia Kempner, Vadim E. Levit 148

Distance between objects described by predicate formulas

Tatiana Kosovskaya 153

On the discretization of distance geometry problems

Antonio Mucherino, Carlile Lavor, Leo Liberti, Nelson Maculan 160

Geometrical tools for alpha-Voronoi partitions

Atsumi Ohara and Yuya Nagatani 169

Metric tensor as degree of coherence in the dynamical organization of the central nervous system

Sisir Roy, Rodolfo Llinás 174

Hardware implementation of rank codec

Igor Y. Sysoev, Ernst M. Gabidulin 181
