ITHEA IBS ISC No.: 30

First edition

Printed in Poland

Recommended for publication by The Scientific Council of the ITHEA Institute of Information Theories and Applications

This issue contains a monograph that concern actual problems of research and application of computational models for business and engineering domains, especially the new approaches, models, algorithms and methods for computational modeling to be used in business and engineering applications of intelligent and information systems.

It is represented that book articles will be interesting for experts in the field of information technologies as well as for practical users.
